

“With ICGReport, the distances don’t exist between your stores and you”

ICGReport, statistics and alerts from a smart phone or tablet

ICGReport is a reporting system for general managers and members of the board. It works based on very complete statistic reports that supports the possibility that each client customizes them. Allows consulting Kpis (indicators and alerts), in any part of the world from any smart phone or tablet (Android, iPhone, Windows).

ICGReport is integrated with the ERP ICGManager

Get the statistics and the alerts of your company from your smart phone or tablet (Android, iPhone, Windows)

“Dispose of all the statistic information of your company through indicators and alerts in real time and from anywhere to your mobile device. Customize it according to your needs”
